Estrato Floorboards

20mm Engineered Oak

Estrato floorboards provide an easy to lay, very stable alternative to a solid floor, making it especially suited to use with underfloor heating. With a full 6mm solid Oak layer and square shoulders to minimise joint lines and create a smooth continous finish, Estrato has the look, feel and longevity of a solid floor. The boards are completely re-sandable should you ever wish to renew the finish.

This is a very universal product, suitable for most flooring applications in new builds, refurbs and heritage / restoration projects. With the flooring being in mixed lengths and produced from a character grade Oak, the Estrato has the look and feel of a traditional oak floor. Being unfinished gives you the choice of creating whatever type of finish you wish. This product is also ideal for distressing to create an aged look for projects requiring this.

- Quality engineered construction provides maximum stability
- Natural features create an interesting floor
- Suitable for use with underfloor heating
- Delivered in 3 – 5 days, over 1000m^2 in stock

✓Application Instructions

- **Suggested applications -** Ideal for traditional and modern applications alike. Suitable for any room in the house, with the exception of bathrooms and wet rooms which are not recommended (speak to us if this is a must, as there are ways it can be done).

- **Fixing -** Correct methods of laying and fixing Oak flooring are critical to both its look and its function. Read our flooring fixing tips here: www.hewinsoak.com/help/3-interiorarticles/19 flooring-fixing-tips or scan below. Give us a call to discuss your project and we can talk you through the process...
